Investment focus

Global equities ETF portfolio

Recommended minimum investment period

5 years

Investment strategies pursued

ETF strategy

Expected return p.a.*

10 %

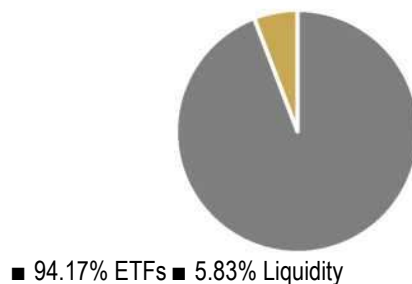

Minimum investment amount

€ 25,000.00

* The expected or estimated return is the return before costs and constitutes a forecast of future performance. This forecast is based on a careful analysis of objective data of different market trends as well as the professional experience of the asset manager. It is not a reliable indicator that this return will actually be achieved. Costs have a negative impact on this return. Any historical performance data are not a reliable indicator of future performance. When historical performance data are provided, the outcome always represents performance before costs.

Risk and investment objectives

Risk classification

Higher risk

The risk classification indicates the opportunity and risk profile of a portfolio and is designed to reflect the appropriate profile of the investor. The computation of the risk and return profile is based on historical data, which are not a reliable indicator of the future risk profile.

Primary investment objectives

- Capital growth
- Capital optimisation

Costs

Asset manager's fee

Annual asset management fee of 1.428% incl. VAT based on the average portfolio value. Fee to be paid quarterly on a pro rata basis.

All fee payments for portfolio commissions which we receive in accordance with our cooperation with V-Bank will be passed on to you.

Custodian fees

Annual service fee of the custodian bank of 0.0714% incl. VAT based on total assets, at least EUR 35.70 incl. VAT. 0.2% of the order volume per transaction, but at least EUR 5.00, at most EUR 25.00.

Product costs

Product costs are a function of the categories used (equities, ETFs or funds). For example, a portfolio composed only of equities does not incur any product costs.
